

Lee Hossley Orosco, FCSI

“For your notable leadership in organizing, teaching, and developing a course in written construction documents taught in both on-site and distance learning; for your influence in promoting the use of CSI principles and formatting by a worldwide manufacturer; and for your dedicated service to CSI, you are advanced to Fellowship in the Institute on the 29th day of June 2002.”
Los Angeles, California

LEE HOSSLEY OROSCO spent her childhood dreaming of being a writer. Events unfolded that steered her away from that into engineering. Now, after 25 years in the construction field, she is a specifications manager so the writer dream is fulfilled!

Lee graduated from New Mexico State University with a bachelor's in engineering technology with a civil option. Her first job was with Proctor and Gamble at their Duncan Hines plant in Omaha, Nebraska. The next stop was with Albuquerque Testing Laboratory in Albuquerque, NM where she spent 5 years in the field performing soil, concrete, and asphalt test. Then, for 2 years she focused on marketing side of the business.

Ms. Orosco was marketing manager for Holmes and Narver's Albuquerque office for 5 years. She loved the contact with people and enjoyed writing proposals to clients that described how Holmes and Narver would provide excellent architectural and engineering services.

Intel Corporation was her home for 16 years where she held positions as Site Strategic Planner and Global Specifications Manager.

February 2008, Lee moved to Phoenix with Carollo Engineers to become their National Specifications Manager. She found out about this opportunity on the CSI website's job postings. Carollo has been a great place to work and grow.
